Dear Member,

The IEK Weekly Newsletter offers a roundup of recent Institution of Engineers of Kenya (IEK) events and upcoming ones, activities by the various committees, and any upcoming developments that affect Engineers and the Built Environment.

This newsletter is a roundup of activities in the 1st Week of August 2026 (IEK/NL/197).

Caretaker Committee Steers Institution to New Council Elections

Monday, 3rd August, 2026

The Institution of Engineers of Kenya (IEK) successfully concluded an important leadership transition in 2026, demonstrating the strength of member participation, institutional continuity and professional governance.

The transition followed the expiry of the 2024–2026 IEK Council's term in April 2026. During this period, members initiated discussions on the way forward for the Institution, culminating in a Special General Meeting held on 21 May 2026 at the United Kenya Club in Nairobi. The meeting attracted 37 members physically and more than 600 participants virtually, reflecting significant interest among members in the governance and future direction of IEK.

At the SGM, members resolved to establish a nine-member Caretaker Committee to provide leadership during the transitional period and guide IEK towards the election of its 2026–2028 Council. The resolutions were subsequently presented to the Office of the Registrar of Societies, which formally recognised the Committee in a letter dated 28 May 2026.

The Caretaker Committee comprised:

- Eng. Hilary Nyaanga – Chairperson: Provided overall leadership to the Committee and coordinated the Institution's transition.
- Eng. Muguru Wairimu – Secretary: Coordinated Committee records, correspondence and administrative matters.
- Eng. Fanuel Kiwinga Mwashigadi – Treasurer: Oversaw financial matters and supported continuity in the Institution's financial administration.
- Eng. Jane Mutulili – Member
- Eng. Kennedy Wamalwa – Member
- Eng. David Mutonga – Member
- Eng. Stanley Musau – Member
- Eng. Margaret Ogai – Member
- Eng. Lilian Ogombo – Member.

Working collectively, the six Committee members supported the Chairperson, Secretary and Treasurer in implementing the transitional mandate and maintaining continuity across IEK programmes and stakeholder engagements.

The Registrar of Societies gave the Committee a clear mandate to oversee IEK's day-to-day administrative affairs, safeguard the Institution's assets and financial records, maintain engagement with key partners and ensure that services to members continued during the transition. The Committee was also required to act impartially and in accordance with the registered IEK Constitution 2015 while preparing the Institution for the eventual election of a new Council.

Despite the unusual circumstances surrounding the transition, IEK's programmes continued. The Institution maintained its professional-development activities, technical engagements, conferences, partnerships and preparations for major events, including the 2nd Womens Engineers Summit, 2nd AJERI Scientific Conference and the forthcoming 33rd IEK International Convention. Official IEK communications during the period show the Caretaker Committee participating in and supporting professional activities on behalf of the Institution.

The electoral process itself underwent a number of legal and procedural stages. A High Court decision on 17 June 2026 discharged earlier interim orders affecting the transition, enabling the Caretaker Committee to continue with its mandate. Another court matter temporarily affected the election date that had been planned for 27 July 2026.

Ultimately, the process culminated successfully on 3 August 2026, when IEK members elected the Council that will lead the Institution for the 2026–2028 term. Eng. Harrison Keter was elected President after previously serving as First Vice President.

The successful completion of the elections marked the fulfilment of one of the Caretaker Committee's most important responsibilities. What began as an interim arrangement ultimately provided the framework through which IEK maintained institutional continuity and returned to elected Council leadership.

The 2026 transition will remain an important chapter in IEK's institutional history. It demonstrated the value of an engaged membership, continuity of professional programmes and the willingness of engineers to take responsibility for the governance of their Institution. With the new Council now elected, IEK enters its next chapter with an opportunity to build on that spirit of participation and focus firmly on professional excellence, member service and the contribution of engineering to Kenya's development.

A New Chapter in IEK Leadership

Monday, 3rd August, 2026

The Institution of Engineers of Kenya (IEK) has concluded its 2026–2028 Council elections, marking the end of an unusually long electoral process and opening a new chapter in the governance of the Institution.

Voting was conducted electronically on Monday, 3 August 2026, with 2,181 members casting their ballots. This translated to a turnout of more than 75 percent.

The provisional results saw Eng. Harrison K. Keter elected President for the 2026–2028 term. He previously served as IEK First Vice President and succeeds Eng. Shammah Kiteme. Eng. Howard A. M'mayi was elected First Vice President unopposed, while Eng. John Robert O. Ogallo was elected Second Vice President unopposed.

The Council-elect comprises:

- Eng. Harrison K. Keter – President
- Eng. Howard A. M'mayi – First Vice President
- Eng. John Robert O. Ogallo – Second Vice President
- Eng. Grace M. Kagundu – Honorary Secretary
- Eng. Ingaiza A. Murambi – Honorary Treasurer
- Eng. Yvonne Robert, Eng. Damaris K. Oyaro, Eng. Dennis D. Barongo, Eng. Patrick O. Otuoma, Eng. Nashon O. Tambo and Eng. James K. Nyabuto – Ordinary Council Members.

The 2026 elections followed several months of legal and institutional developments. Elections originally scheduled for March were halted amid court proceedings concerning the Constitution governing the election and questions over voting rights for graduate members. Following the expiry of the outgoing Council's term, members convened a Special General Meeting on 21 May, which established a nine-member Caretaker Committee. The Registrar of Societies subsequently recognized the Committee. A separate petition concerning graduate voting rights was dismissed by the High Court on 17 June, allowing the transition process to continue.

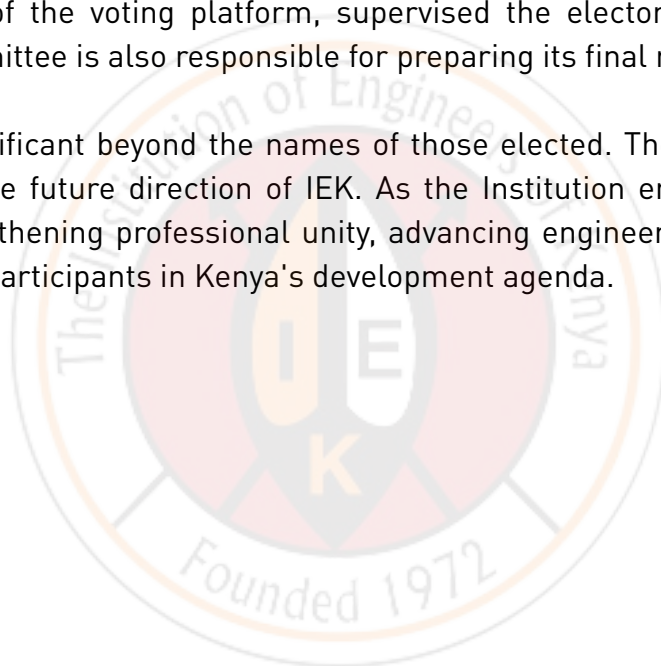

A New Chapter in IEK Leadership

Monday, 3rd August, 2026

A revised election date of 27 July, 2026 was later affected by another court application. Following the subsequent resolution of the legal process, the election finally proceeded on 3 August, 2026.

Throughout this period, the Scrutineers Committee, chaired by Eng. Stephen Auma, worked with candidates and their agents on the electronic voting process. Scrutineers underwent system training, participated in preparations and validation of the voting platform, supervised the electoral process and generated the provisional results. The Committee is also responsible for preparing its final report ahead of the AGM.

The election is therefore significant beyond the names of those elected. The record turnout demonstrates strong member interest in the future direction of IEK. As the Institution enters its next leadership cycle, attention now turns to strengthening professional unity, advancing engineering practice and ensuring that engineers remain influential participants in Kenya's development agenda.

IEK Future Leaders Committee Engages MMUST Ahead of 33rd IEK Convention and 5th Future Leaders Summit

Friday, 7th August, 2026

The Institution of Engineers of Kenya continues to strengthen engagement with universities ahead of the 33rd IEK International Convention and 5th Future Leaders Summit, with the Future Leaders Committee undertaking a courtesy visit to Masinde Muliro University of Science and Technology (MMUST) on 10 August 2026.

IEK was represented by Eng. Annette Ingaiza, Honorary Treasurer-elect, and Eng. Kennedy Wamalwa, Member of the IEK Caretaker Committee. The delegation held discussions with Dr. Benard Omondi of the Department of Civil and Structural Engineering, School of Engineering and Built Environment at MMUST. The engagement focused on the forthcoming Convention and, particularly, opportunities for MMUST students and representatives to participate in the 5th Future Leaders Summit.

The discussions were positive, with both institutions recognizing the importance of creating stronger connections between university engineering education and the professional engineering community. IEK is optimistic that MMUST will be well represented at the Convention, providing students with an opportunity to interact with practicing engineers, researchers, policymakers and industry leaders.

The 33rd IEK International Convention will run from 24–27 November 2026 in Mombasa under the theme “Intelligent Systems for Accelerated and Sustainable Growth.” The 5th Future Leaders Summit will take place on 24 November under the theme “Preparing the Next Generation of Engineers for a Digital and Intelligent Future.”

For IEK, university engagement is particularly important as the engineering profession adapts to artificial intelligence, automation, digital infrastructure and rapidly changing industry requirements. Future engineers need more than academic knowledge; they need early exposure to professional networks, industry conversations and the opportunities available within the wider engineering ecosystem.

IEK Future Leaders Committee Engages MMUST Ahead of 33rd IEK Convention and 5th Future Leaders Summit

Friday, 7th August, 2026

The MMUST visit forms part of ongoing efforts to mobilize universities and young engineers for the November gathering. Further discussions on participation and the next steps will continue as preparations progress.

By bringing students closer to the profession, the Future Leaders Summit seeks to ensure that the engineers who will shape tomorrow's Kenya begin engaging with the challenges and opportunities of that future today.

IEK Engages Joadah Consult on Strategic Engineering Collaboration

Friday, 7th August, 2026

The Institution of Engineers of Kenya (IEK) has held discussions with Joadah Consult as part of its continued efforts to build partnerships that strengthen the engineering profession and create new opportunities for collaboration.

IEK was represented during the engagement by Anvar Alot, Policy, Research and Partnerships Manager, and Kennedy Mwanza, ICT Officer.

The meeting provided an opportunity for IEK and Joadah Consult to explore areas of mutual interest and consider how the two organizations can work together in initiatives that contribute to engineering innovation, knowledge exchange and professional development.

Partnerships have become increasingly important as engineering moves beyond traditional disciplinary boundaries. Digital technologies, data-driven decision-making and new approaches to infrastructure are changing how engineers plan, design, construct and manage projects. Building meaningful relationships between professional institutions and organizations working within this evolving environment can therefore create valuable opportunities for engineers.

For IEK, such engagements are also part of a wider strategy to strengthen the link between the engineering profession, technology organizations and industry. Effective partnerships can provide platforms through which engineering knowledge is translated into practical solutions while exposing professionals and young engineers to emerging technologies and new ways of working.

The meeting with Joadah Consult represents an initial step towards identifying areas where the two organizations can create shared value. Further engagement will focus on defining practical areas of cooperation and opportunities that can benefit IEK members and the broader engineering community.

The Energy (Solar Water Heating) Regulations, 2025

Dear Member,

There's a significant regulatory shift in the energy sector.

On 9th July 2025, the Cabinet Secretary for Energy and Petroleum gazetted the Energy (Solar Water Heating) Regulations, 2025.

These regulations establish a mandatory framework for the entire solar water heating value chain in Kenya. Whether you are involved in manufacturing, importing, selling, or simply maintaining these systems, these rules now apply to your operations. Under these regulations, all persons and entities involved in the importation, manufacture, sale, installation, or repair of solar water heating systems must be licensed by the Authority.

Compliance Deadline: All entities are required to comply with all aspects of these regulations within one (1) year from the date of gazettelement (by July 2026).

EPRA has launched an online system for licensing applications for both workers and contractors. You can access the necessary documents and application portals via the links below:

- Licensing Guidelines:
[Download Application Guide](#)
- Official Regulations:
<https://epra.go.ke/energy-solar-water-heating-regulations-2025>

Please ensure you review these requirements promptly to avoid any operational disruptions as the compliance deadline approaches

IMPORTANT UPDATES

REWARD MECHANISM FOR MEMBERS SUPPORTING RESOURCE MOBILIZATION

Each mobilized resource is tied to a specific event, and members may choose either a delegate fee waiver or a 5% commission.

AMOUNT MOBILIZED (KES.)	DELEGATE FEE WAIVER
100,000 - 249,999	25% waiver
250,000 - 499,999	50% waiver
500,000 - 999,999	75% waiver
1,000,000 and above	100% waiver

Integrity: Members will not be allowed to mobilize funds from their current employers or organizations where they work, particularly if these are regular or existing IEK partners, to avoid conflicts of interest.

Existing Partners: Contributions from existing or regular IEK partners will be excluded from the incentive scheme. This is intended to motivate members to pursue new partnerships and grow IEK's funding base.

Terms and Conditions, including applicable taxes, apply.

Be visible, grow your Brand **Advertise with Us!**

The Engineering in Kenya Magazine is published by the Institution of Engineers of Kenya (IEK). The magazine has a wide audience amongst Engineering professionals and beyond, including stakeholders and policy makers both in public and private corporate entities.

Advertising with us will bring you to the attention of these stakeholders and give you the opportunity to grow your market. Our print run is 3,000 hardcopies and over 229,000 in digital circulation, bimonthly.

Get noticed in our next edition. Reach out to the IEK secretariat on 020 2729326; 020 2716922 or via email to: editor@iekenya.org

Yours faithfully,
Eng. Muguru Wairimu
Secretary - Caretaker Committee, IEK
The Institution of Engineers of Kenya
